

SmartHome: Home Automation System

Individual Contributions

Group 5

Zachary Allin

David Fu

Sharlina Keshava

Shelley Tong

Project Management Information:

Opening accounts on public websites for the project

- Shelley Tong opened the Google Site for the project.
- Sharlina Keshava initiated the Google Drive space to host collaborating projects
- Zachary Allin opened and uploaded to the Github account

Organizing meetings

- Each team member had an equal contribution to organizing group meetings. We discussed amongst the four of us for a time that worked for all of us.

Coordinating Activities

- As with organizing group meetings, each team member had an equal contribution to the coordination. We discussed amongst the four of us for a time that worked for all of us when we could coordinate combining the project from its pieces.

Installing and Maintaining Developer's Resources

- The three main components of the project were each managed by the team members in charge of that component. The breakdown is as follows:
 - MySQL Database: Shelley Tong
 - 3D Simulation House (Java 3D): David Fu
 - Mobile Web App (Java ServerFaces): Sharlina Keshava and Zachary Allin

Combining The Contributions

- Each team member compiled their resources and then were uploaded together to a public-facing resource by Zachary Allin.
